

Videora iPod Converter is a free program that can be used to convert videos created with Windows Movie Maker into a format that can be played on the iPod. Videora converts the .wmv format used by Windows Movie Maker into .mp4.

Installing Videora iPod Converter

Download Videora iPod Converter from the following website:

<http://www.videora.com/en-us/Converter/iPod/>

To install the program:

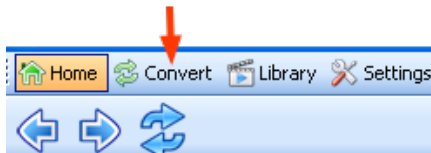

1. Double-click on the install file you downloaded from the Videora website.
2. Select English as your language.
3. Click Next on the welcome screen.
4. Click on I Agree to accept the license agreement.
5. Click on Next, then on Install.
6. Once the program has been installed, click on Finish to close the install wizard.

You may be prompted to install .Net. The Videora installer will download and install the required .Net files for you.

Converting a Video

To convert a movie saved as .wmv:

1. Open Videora by clicking on its icon.
2. Click on the Convert button.

3. Choose the Current Conversion tab.

4. Click on One-Click Convert.. for automated conversion.

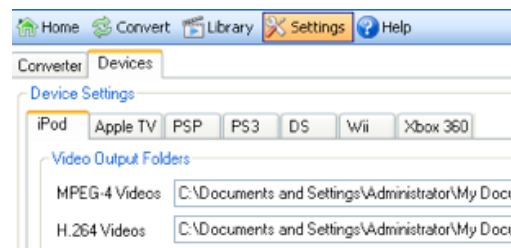

5. Locate the file you want to convert and click on Open.

6. The conversion process will begin and a progress bar will let you know how much time is left.

7. The converted video will be saved to the output location specified in the Settings:
 - Choose Settings > Devices > iPod

- Click on the Browse button for H.264 videos and choose the folder where you want to save your videos. The default profile will save your videos to My Documents\ConvertedVideos\iPod\H264.

Transferring to the iPod

Videora should automatically transfer the converted video to iTunes so it can be synched with an iPod. If you need to manually add a converted video to iTunes:

1. Open iTunes and select File > Add File to Library.
2. Locate your converted video and click on Open.
3. To view your movie, click on Movies in the iTunes Library. The movies in your Library will be listed on the right.
4. Select your movie and click on Play to view your movie.

To transfer the movie to your iPod, plug in your iPod and it should synch automatically. You can also manually synch iTunes with your iPod by choosing File > Sync iPod.
