### Notes to the Teacher

Children may be told the number of students in the class if they ask. Try not to use a number that is a multiple of three. This makes the problem too easy.

### **SNACK MIX**

Your class is having an activity that includes refreshments. Your job is to plan a special snack mix for the class. Each student will get  $\frac{2}{3}$  cup of this mix. You must use at least 3 ingredients from the list below, but you may use more. Use fractions but do not use equal amounts for any two ingredients. List the ingredients you have chosen and the total amount of each ingredient to make the snack for the whole group.

List of ingredients:

Cereal  
Chocolate chips  
Coconut  
Marshmallows  
Peanuts  
Popcorn  
Pretzels  
raisins
