Ch. 11: "Five Heads Together"

The Adventures of Jerry Muskrat

Directions: "Two heads are better than one" is a saying or moral. It might mean something like: what one person doesn't think of the other might, or one person's idea might help another solve a problem, or working together is easier and better than trying to work alone. Grandfather has decided what the problem in this story might be. How do you suppose Grandfather could fix the problem all by himself? Write the next chapter in this book and show how Grandfather Frog might solve the problem by himself. Then read Chapter 12.
