***Fairy Tales Every Child Should Know***

“The Three Bears”

Robert Southey

**Reading Level: 5.7**

**Activity:**

1. What is the probability of Silver-hair choosing the porridge that is “just right” on her first try?
2. What is the probability of Silver-hair choosing the “just right” chair on her first try?
3. What is the probability of Silver-hair choosing the “just right” bed on her first try?
4. Are the events above independent or dependent of each other? Explain.
5. What is the probability that Silver-hair chooses “just right” on her first try for all three situations?
