Adding White Space in Microsoft Word to Improve the PDF Conversion Process

Adding white space around your images can make it easier for the PDF Maker to properly tag your documents for accessibility when it does the conversion from Microsoft Word to the PDF document format.

One way to add white space is by placing your cursor immediately after each image and adding a few carriage returns by pressing the Enter key on your keyboard. However, a better way to add the white space is to use the Paragraph Styles built into Microsoft Word:

1. In the Ribbon, select the Home tab, then in the Styles section select Change Styles.

2. Select Paragraph Spacing and choose one of the built-in styles. As you select each style set, you should see a real time preview in the document window (no spacing, compact, tight, relaxed, double, etc).

Styles		Style Set	•
		<u>C</u> olors	×
	Α	<u>F</u> onts	⊬
Built-In	E.	Paragraph Spacing	•
No Paragraph Space	-	<u>S</u> et as Default	
Compact			

3. To customize the spacing, choose Custom Paragraph Spacing at the bottom of the list.

Built-In	
	No Paragraph Space
	Compact
	Tight
	Open
	Relaxed
_ <u>↓</u>	Double
<u>C</u> u	stom Paragraph Spacing

4. In the Manage Styles window, enter the amount of desired white space in the Before and After fields found under Paragraph Spacing.

-			_			1.000		
Font						Si	ze:	
+Bo	dy					1	1	
+Bo	dy			•		8		
+He Age	adings					1	0	
Ahar	roni					1	1	
Alge	rian			-		1	2	-
Font	color:		Automatic	-				
Paragr	anh Positi	00		10000	8			
Loft	april obid				Special	B		
Leita		0-			Special:	DY		
Right	t:	0"			(none)	-		-
Align	ment:	Left				-		
Paragr	aph Spaci	ng			-			
Befor	re:	12	ot	*	.i <u>n</u> e spacing:	At	:	
After	:	6 p	t	*	Multiple	• 1	. 15	

After you add the white space you should notice more separation between your images and the surrounding text, as well as between your paragraphs. This can make the paragraphs stand out so that they are easier to read.
